Advanced Services for new established
companies in oil and gas sector

Empowering New Ventures in the Oil and Gas Industry

At NEDA Group, we specialize in guiding newly established companies in the oil and gas sector through every stage of their development. From strategy formation to operational setup, we provide a full suite of business consultancy services designed to ensure sustainable growth and market success.

Key points:

- Business Strategy Development
- Financial Planning and Forcecasting
- Regulatory compliance
- Brand Development and Marketing
- Technology Solution
- Operational Setup

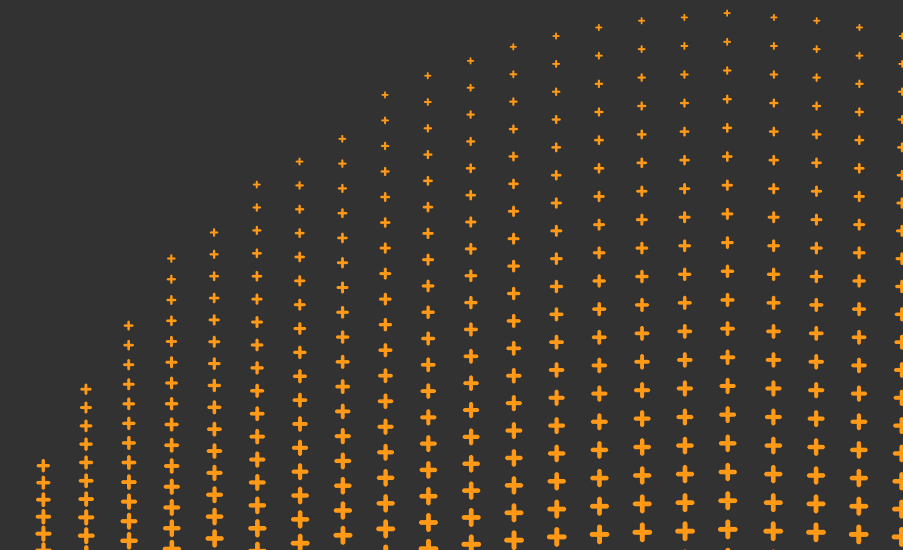

Business Strategy and Financial Planning

We offer specialized services focused on strategic planning and financial success. By aligning the company's vision, mission, and market analysis with comprehensive financial strategies, we ensure that businesses are well-positioned for competitive advantage.

Key points:

- Developing financial models and funding Strategies
- Cash Flow management and budget Creation
- Client Success stories that showcase our proven result in financial planning

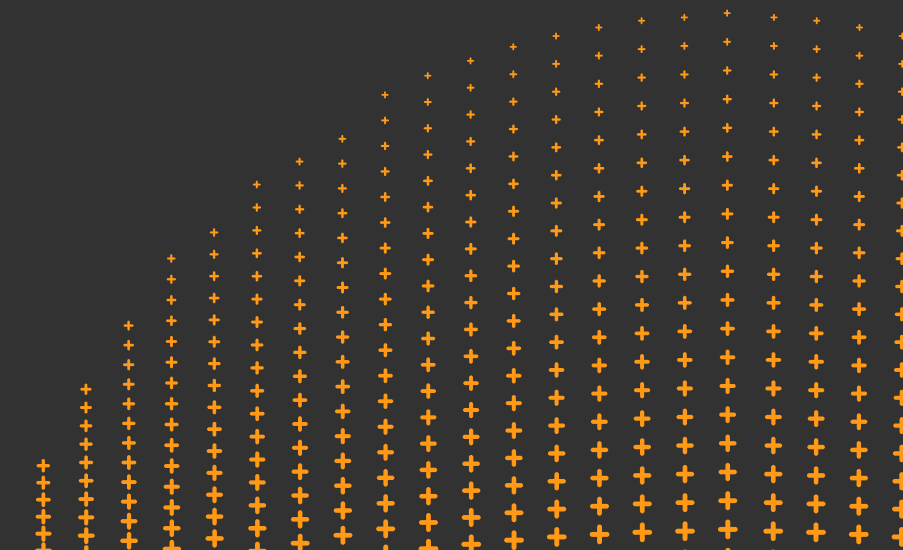

Legal Services for the Mining, oil and Gas Sector

Our firm provides specialized legal and claims management services, uniquely designed to address the complex challenges faced by the mining, oil, and gas industries. With deep expertise in regulatory frameworks and the operational intricacies of these sectors, we help our clients efficiently navigate legal challenges, minimize risks, and enhance operational success.

Legal Services:

- Regulatory Compliance and permitting
- Contract Negotiation and Drafting
- Risk Management and Liability
- Dispute Resolution
- Corporate Governance and Due Diligence

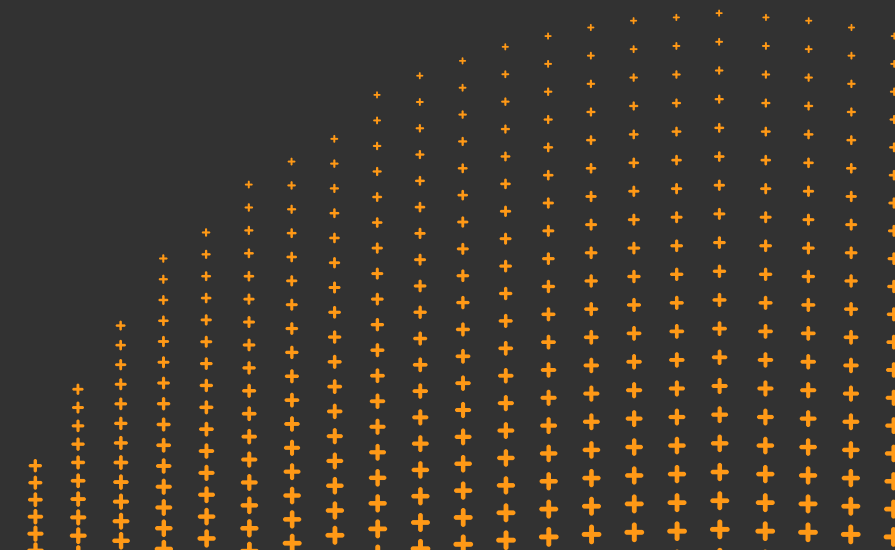

Claim Services

We offer comprehensive claims management solutions, guiding clients through every stage of the claims process from initial assessment to final resolution. Our structured approach ensures efficient, fair outcomes without prolonged legal disputes.

Key points:

- Claim Assessment and Strategy
- Insurance Claim Services
- Construction Claim
- Dispute Resolution and Mediation
- Document preparation and Filing

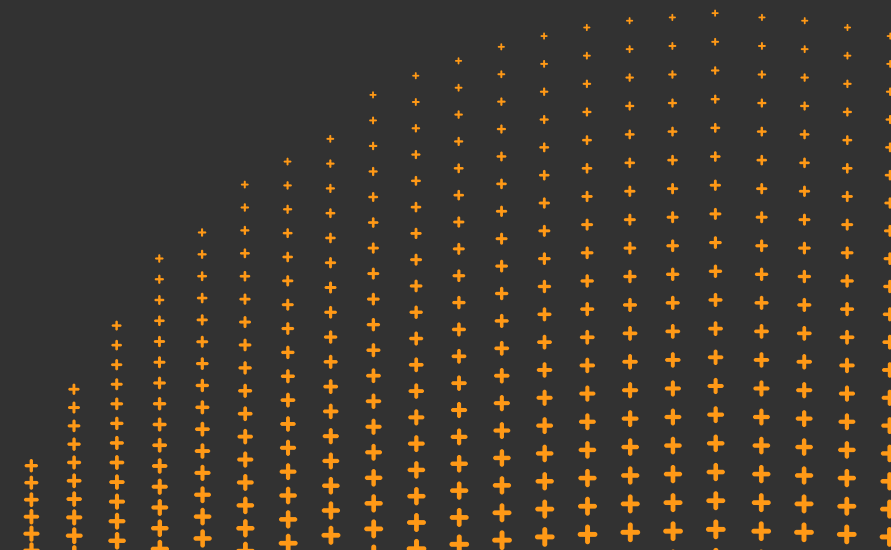

Drafting Services for Contracts and Procedures

Delivering Expertly Crafted Contracts and Standard operating Procedures to protect your business from legal and risks and operational efficiencies.

Key points:

- Contract Drafting and Review
- Standard Operating Procedures (SOPs)
- Risk Mitigation Clauses
- Compliance with Local and International Laws
- Document Management and Updates

Our Service Delivery Process

Optimizing Client Success Through a Structured Approach

Advanced Services for the Modern E&P Industry

E&P Industry

The exploration and production (E&P) industry worldwide focuses on the discovery, extraction, and refinement of oil and natural gas resources. It is a crucial sector within the energy industry, playing a vital role in meeting global energy demand. Here are key points summarizing the E&P industry

01

Technological Advancements:

Continuous innovation in technology, such as advanced drilling techniques and digital solutions, enhances efficiency and reduces environmental impact.

02

Global Significance:

The E&P industry supplies a significant portion of the world's energy needs, driving economic growth and development in many countries

03

Challenges:

the industry faces challenges including fluctuating oil prices, regulatory changes, environmental concerns and geopolitical risks.

04

Global Operations:

E&P activities occurs in diverse locations worldwide, including offshore and onshore fields, each presenting unique governance and technical challenges.

05

Sustainability:

Increasing focus on sustainability drives efforts to minimize environmental impact, promote energy efficiency, and develop energy alternative solutions.

E&P in Iran

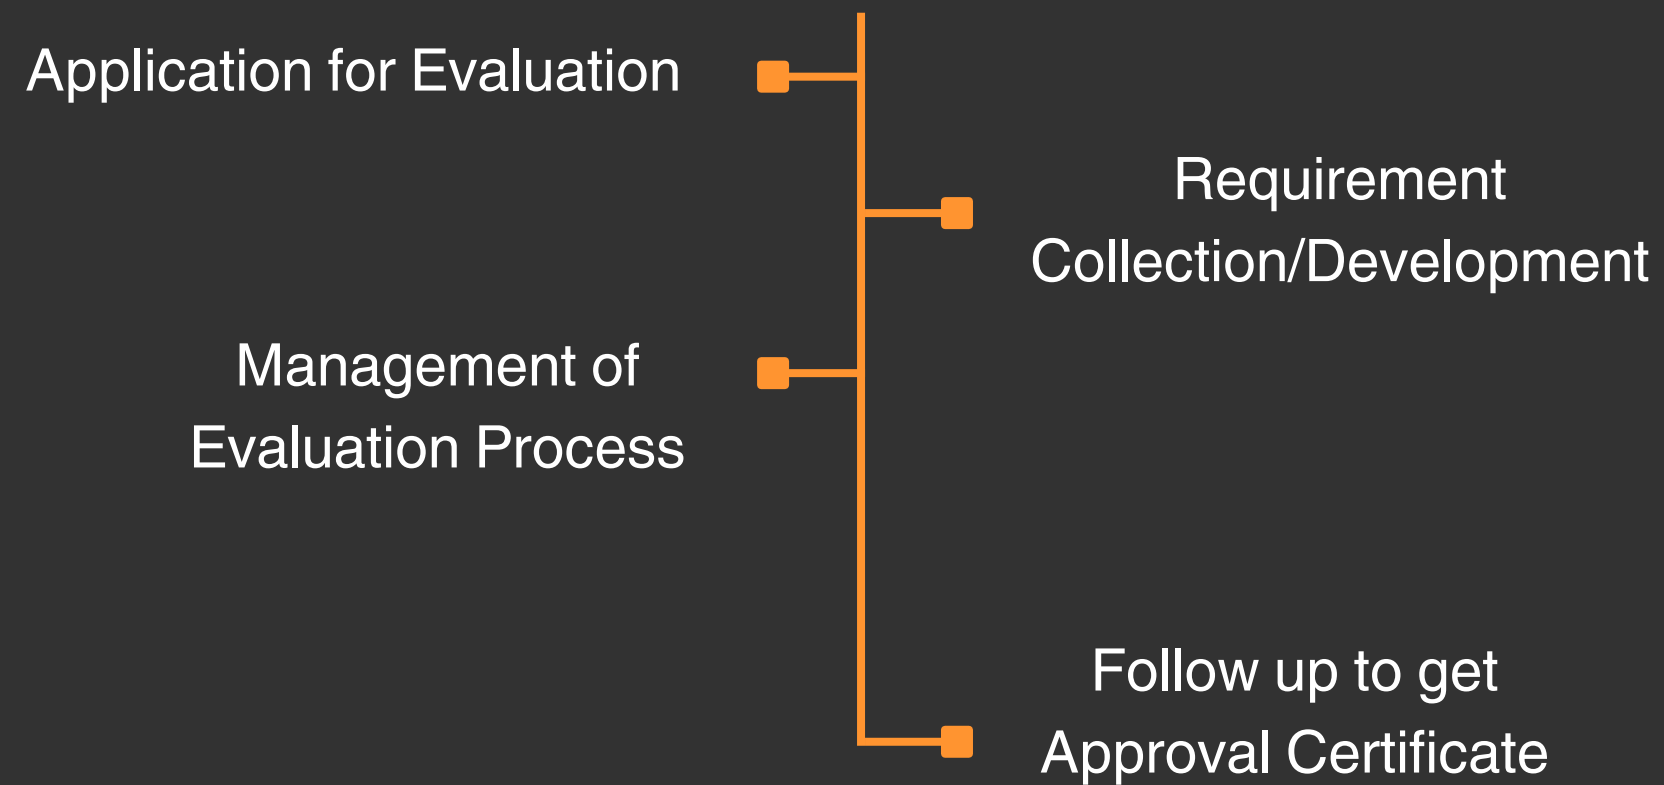

The National Iranian Oil Company (NIOC) has made significant strides in the country's oil and gas industry by introducing a new model of oil contracts known as IPC. According to the nature of this model, the participation of Iranian companies as partners with foreign companies in all phases of exploration and production has become a contractual obligation. Therefore, the Ministry of Oil has invited all interested domestic companies to participate in the exploration and production activities by announcing a call, inviting them to undergo qualification evaluation for consideration

Before the introduction of IPC and due to restrictions imposed by the fiscal regimes of petroleum contracts, no Iranian company had participated in Iran's upstream industry as an exploration and production (E&P) entity.
